Recruitment Test for Position: UI and Frontend Developer

The following test has been designed to measure 4 different components:

- Advance Web Technologies to implement the design into HTML5/CSS3
- Attention to details in general, but most focused in code (front-end).
- Comprehension and retention of received instructions by email
- Ability to learn new technologies

Please read this test completely before you start.

Follow all instructions described in the 5 points below.

Good luck!

1. **DISC test:** Please take this [Personal Strengths Profile test](#) and please type as well your own results below.

DISC Values
